Hi Don,
Can you tell Odysseus the species of trees being planted on the west side?

I get it. What kind of trees and how are they mitigating the extensive root systems of the ficus in order to allow new trees to take root?

I understand if you don't personally have that answer and if you need to forward me to the person who does.

Hi Odysseus,
Thank you.

The work on the sidewalk on the west side of Sepulveda should begin end of fall. Since it was a federal grant, it has to go through all sorts of approvals by the Feds and CALTRANS before the City can bid the project - which should be happening very soon.

I hope this answers your question,
Nate

Nate,

First, congratulations on your new position.

I saw on sepulveda (near the ymca) that many of the trees have signs indicating their upcoming removal.

When is the sidewalk going to be fixed and trees re-planted on the other side, where the other trees were removed last year? I thought the tree removal was fairly ill-conceived to start, but now that they're gone - when does it get fixed and why are more trees going away before the

first side is fixed?

Hope all is well!

Odysseus
